

RESOURCES – Water, Foods, Equipment, cleaning, cookware, storage

Not everything on this list will be appropriate for you especially the foods, but I may have suggested something specific for your plan in the links below. There are lots of other great products out there but these are the ones that I have personally used and tried so far.

Water Filters		Link
I recommend a glass jug water filter	Various companies do them: Britta, Waterdrop, Aquaphor (Glass Maxfor+), Wesser etc.	These are available on Amazon
Britta Water Filter	Basic, will not remove as many impurities as the ones below	Amazon, supermarkets etc
BottlePro Bottle	This is a bottle with a filter that you drink from directly. Takes a little sucking power as the water is filtered as you suck, but I like this one, the filters last for 2 months also. You can get these at discount from The Natural Dispensary and replacement filters (comes in green or black).	https://naturaldispensary.co.uk/products/BottlePro_Green_Water_Filter_Included-10007781-0.html
Black & Blum Charcoal Water Filter Sticks	Traditional Japanese way of filtering water. Need to leave the sticks in for a certain number of hours for them to filter. This set of sticks will last 6 months	Amazon
Zero Water Jug	Zero Water (filters are about £15 per month) – purchase from Amazon –this water tastes very good but it does remove all of the impurities including the minerals.	You can purchase these jugs on Amazon also at discount on the Natural Dispensary and also the replacement filters. Removes all toxins and minerals
Phox Glass Jug	Will need to purchase regular filters	https://www.phoxwater.com/
Berkley	Expensive option – large metal filter tank	https://berkey-waterfilters.co.uk/

Foods		Link
Short grain brown rice	The original rice. This rice holds much more moisture.	Buywholefoods online (from their website https://www.buywholefoodsonline.co.uk/ or Amazon) or Wholefood Earth https://www.amazon.co.uk/dp/B08GDFR1ZB?ref=nb_sb_ss_w_as-reorder_k8_1_6&=&crd=1Z13AOR1DC68E&=&sprex=short+

<p>Natural Soaps Solid shampoo Facial cleansing bar</p>	<p>As a previous soap maker I am pretty fussy about my soaps and I would only use a cold processed traditional method soap.</p> <p>One of my favourite companies is The Little Soap Company. They also have unperfumed soaps for sensitive skin. I particularly love their Citrus & Lavender.</p> <p>They also produce natural shampoo bars and facial cleanser bars, which are fabulous.</p>	<p>This is their website but you can also purchase their products on Amazon. https://www.littlesoapcompany.co.uk/</p>
<p>Deodorant – aluminium free</p>	<p>Pit-rok, Green People, Urtekram</p> <p>Tisserand deodorants with essential oils – 5 wonderful blends</p>	<p>The Natural Dispensary</p> <p>https://www.tisserand.com/?ywcas=1&post_type=product&lang=en_GB&s=deodorant</p>
<p>Natural & cruelty free cleansing pads, make up, personal care</p>	<p>Good selection of natural make up, skin care, deodorant sticks, soaps,</p>	<p>https://www.peacewiththewild.co.uk/</p>
<p>Fluoride-free Toothpaste</p>	<p>Splat Calcimax (Amazon) – cheapest option Dentalcidin Revitin</p> <p>Dentalcidin and Revitin were created by well known Biological / Holistic Dentists – they are expensive but good. You only need a pea sized amount of toothpaste on your brush, it is actually the brushing that does most of the work.</p>	<p>https://www.amazon.co.uk/gp/product/B0725M67F1/ref=ppx_yo_dt_b_search_asin_title?ie=UTF8&th=1</p> <p>https://www.amritanutrition.co.uk/products/dentalcidin-90ml</p>

Reducing Toxins

Toxin Exposure. We can do a huge amount to improve our health and take the burden off our liver and kidneys, simply by addressing our toxic exposure. Health is often about how many toxins we are exposed to versus how effective we are at eliminating them. Our bodies were never designed to have to detoxify all of huge amount of chemicals we are expecting it to get rid of these days.

Toxins include:

- Solvents, hydrocarbons, cleaning materials, pesticides, herbicides, fertilisers, food additives, PCBs (plastics), vehicle exhaust fumes, combustion products.
- Cosmetics and personal care products (whatever you put on your skin is the fastest way in), fumigants and disinfectants, plasticisers, outgassing from plastics and fabrics, medical drugs (do not however stop any prescribed medications), illicit drugs, heavy metals (e.g. mercury, aluminium, lead), dental materials, Teflon, water supply contaminants (many contaminants, especially oestrogen / hormones which is why filtering water is important), tobacco smoke, alcohol, our exposure to veterinary drugs via the food chain but even exposure to animal's flea collars etc.
- Weather, physical effects of the seasons, geopathic stress, volcanoes, dust, biological allergens, noise is a huge "pollutant" these days, EMF (electromagnetic frequency / Wifi), air pollution.
- Physiological / emotional – toxic emotions.

Gradually try and reduce the use of plastics and cling film for storage cooking, swap for glass instead – plastics can compromise the endocrine (hormone) system. Aluminium is present in almost everyone on a hair mineral test so avoid the use in cooking and aluminium pan, Teflon or non-stick pans are also highly toxic. Swap chemical-based cleaning materials for more Eco-friendly options.

Gradually swap your personal care products for ones with less chemicals such as removing sodium lauryl (or laureth) sulphate or parabens or dramatically reduce your products.

There are also a lot of toxins in household mould, new cars, new furniture, carpets, paint. Artificial fragrance, such as perfumes on the body or in candles, sprays, reed diffusers also the candles themselves unless they are soya or beeswax. The more we can reduce of these, the less burden there is on the liver to detoxify other things such as metabolic waste e.g., hormones, histamine etc.
